

A LIST OF POSSIBLE COMPROMISED GIA CERTIFICATES

As a precondition to transferring funds to the International Trading Corporation for CVD diamonds inscribed with real GIA certificate numbers and certificates, we requested a list of the relevant certified stones. As a public service, DIB publishes these numbers, after having received GIA assurances that all of these certificates refer to genuine, natural diamonds – with absolutely no fear that the stones are anything different from what the certificate states. However, **if one acquired a stone with any of these numbers without a certificate – or with a suspicious certificate, one may wish to contact one's supplier and/or Tom Moses at the GIA.**

Advising **Tom Moses** of having a diamond with such numbers is the only way for the GIA to discover whether there are multiple stones in circulation with the same number. There is no reason to submit the stone itself – an e-mail to Tom will suffice [tmoses@gia.edu]. **This major threat to the industry cannot be resolved without maximum help from the diamond merchants themselves.**
